## Career Objective

I am a motivated Frontend Developer with a strong ambition to become a skilled MERN Stack Developer. Proficient in building interactive and responsive web applications using React, Tailwind CSS, and JavaScript. Currently expanding my expertise in Node.js, Express.js, and MongoDB to develop full-stack solutions. Passionate about problem-solving, innovation, and continuous learning to create high-performance and scalable applications.

## Technical Skills

**Frontend:** • HTML • CSS • JavaScript • React.js • Tailwind CSS • Next.js

**Backend:** • Node.js • Express.js • JWT (JSON Web Token) • Stripe

**Database:** • MongoDB • Firebase

**Tools:** • Git & GitHub • VS Code • Figma • Vercel • Netlify

**Soft Skills:** • Teamwork • Time management • Leadership • Collaboration

## Projects:

**ScholGo** - Scholarship Management System - [Live Site](#) | [Github Client](#) [Github Server](#)

- Overview: A web application that helps students find and apply for scholarships.
- User Roles: Students can search and apply for scholarships, while admins and moderators manage applications.
- Admin Dashboard: Librarians can add, edit, or remove books, manage users, and track book status.
- Payment Integration: Supports online payments for application fees via a secure gateway.
